### Abstract:

Dear josha-journal readers, we welcome all readers to a new issue. JOSHA operates on four key principles: open access, ensuring all articles are freely available to readers worldwide; interdisciplinarity, welcoming submissions from all scientific, artistic, and humanistic disciplines; author copyright retention, allowing authors to keep the rights to their work; and editorial review instead of peer review, where articles are assessed for clarity, relevance, and originality, with the final judgment left to the readers themselves.

**Journal of Science,  
Humanities and Arts**

JOSHA is a service that helps scholars, researchers, and students discover, use, and build upon a wide range of content

Editorial

## Volume 13 Issue 2

Dear josha-journal readers,

We welcome all readers to a new issue. We would particularly like to draw your attention to an interview led by the editor-in-chief Cinthya Souza Simas with JOSHA co-founder Gerhard Steinmann. Gerhard talks in detail about the origins, guiding principles, challenges, and aspirations for the future, with a particular focus on the challenges facing a publicist to artificial intelligence. The **Journal of Science, Humanities and Arts** was developed to offer a platform for innovative yet often overlooked research ideas – those that challenge established norms and risk being dismissed. The journal's mission is to provide a fair chance for unconventional but rigorous research.

JOSHA operates on four key principles: **open access**, ensuring all articles are freely available to readers worldwide; **interdisciplinarity**, welcoming submissions from all scientific, artistic, and humanistic disciplines; **author copyright retention**, allowing authors to keep the rights to their work; and **editorial review** instead of peer review, where articles are assessed for clarity, relevance, and originality, with the final judgment left to the readers themselves.

In the age of artificial intelligence, the journal faces new challenges, including the need to guard against plagiarism, fabricated research, and nonsensical submissions. While JOSHA does not focus on impact factors, it maintains high editorial standards to publish serious, original work.

Looking ahead, JOSHA aims to serve as a bridge between scholars from the Global North and South, particularly amplifying the voices of researchers from regions like India, South America, and Africa. Initiatives such as the **Demetrios Awards** support outstanding theses from early-career researchers, including those from underrepresented areas.

And the best part is: we will continue to develop the journal in the coming weeks and months. I am pleased to announce that we will be launching a new JOSHA website. Stay tuned for more exciting news!

Yours, Stephan Seiler

Vice President International Academy of Sciences, Humanities and Arts
